The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Rault (US 6,242,004).

Rault teaches a multilayered form comprising an adhesive layer (abstract). At least one swelling agent is disclosed (column 2 lines 30-31). High molecular weight polyvinyl alcohol is disclosed as an insoluble/sparingly soluble swelling agent (column 2 lines 62-63). The calcium salt of an acrylic acid polymer crosslinked with divinylglycol is disclosed as an excipient (column 3 lines 19-21). A main layer containing the majority of the active principal is disclosed (column 3 lines 52-53). 0-80% insoluble/sparingly soluble swelling agent and 0-50% excipient are specified (column 3 lines 28-31).

Claims 7-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 7-12 have not been further treated on the merits.

No claims allowed.
